Professional Experience and Curriculum Vitae

We specialise in creative design for off and online platforms. We create brands, design print-based marketing material, develop innovative websites and produce bespoke online software applications. Our considerable commercial experience affords us a thorough understanding of brand design and strategy, enabling us to develop market-leading websites and online marketing material that nets results. Happy clients, happy us!

The F2 team is a highly-organised collective of media professionals and we're passionate about everything that we do: passionate about design, passionate about marketing and passionate about the results that a well-designed and skilfully structured marketing strategy can achieve.

We have an enviable reputation among past and present clients, for whom we've produced an extensive array of projects across all media platforms, and for some of the world's largest organisations.
