## **Professional Experience and Curriculum Vitae**

TOKEN is a Brooklyn based studio that provides design, development and manufacturing solutions for artists, architects and curious individuals. Observation and a careful consideration of function, structural ingenuity, material dynamics and aesthetic coherence are all important characteristics of our practice.

Being curious individuals ourselves, we began developing TOKENnyc in 2009. The result is a collection of historically reverent, handcrafted furniture and lighting products; a distilled representation of TOKEN which aims to provide elements for purposeful, considered living.
