Professional Experience and Curriculum Vitae

I'm a Senior Art Director in Stockholm working with art direction for brand, print production, web design, illustration and some interior design.

I concentrate on strong ideas, clear strategic and have a good feeling for details. I am very responsive to my clients and colleagues to create great results that engage users, meet the client's high standards of innovation and creative skills.

I am one of the "old old" in the Internet marketing business, started my career at Tele2 -1993 where I worked with the "Internet Backoffice". Since that day I have worked with marketing and design, ranging from sketches to full profile manual. I have a great way to get along with customers, understand their needs and offer a further development based on their idea.
