Professional Experience and Curriculum Vitae

Drawing and doodling isn't so much a passion. No more than breathing is a passion. We need to breathe. Some days are great breathing days. Other days you hardly think about it at all. But, you always do it. I think of drawing and doodling as a compulsion. It's an irresistible and urgent act that's constant. It's a language, a process, and a therapy. And it keeps me from being afraid of numbers.

I'm a creative gun-for-hire. Freelance designer, illustrator, creative director.

I constantly create. I love building experiences and communicating brands. I breathe and eat idea generation, concept development, and design. And I'm ignited by collaboration and invention. I'm fueled by curiosity, humor, and the expectation that we have significant experiences every day.
