Professional Experience and Curriculum Vitae

Don't be fooled by the cover image, although I wish I am an extrovert. Being a Graphic Designer for three years has made me more concern about my own thoughts, not bothered about what's happening around me when I'm in my zone. But bring me a carton (or two) of beers and I will show you a much more friendly side of me.

My interest has always been with editorial design, digital print and photo manipulation. But that does not mean that I won't take on other projects. I am meticulous and flexible, quick to pick up new skills and always eager to learn.
