Professional Experience and Curriculum Vitae

I am a Junior Creative that wants to make it in the Advertising Industry. I have a passion for advertising and try to immerse myself in the industry to keep myself up to date with new work from agencies, get inspiration, or just appreciate good campaigns.

I've been an international student since I was young, so have been fortunate to experience a variety of cultures, and meet all types of different people. I enjoy going somewhere new and always up for a challenge in anything I do.
