Professional Experience and Curriculum Vitae
I like to play around with HTML/CSS (HTML5/CSS3) , Photoshop, Illustrator, Flash. Database and Programming is also my favorite and for years I have developed applications with PHP/MySQL , CodeIgniter, Javascript , Jquery and AJAX.

Recently, I'm venturing into Wordpress Plugin Development, Facebook and Mobile Application development. To satisfy my geekery. :)

Looking forward to build long-term business relationships with quality and value, to be both profitable to me and the clients.
