Professional Experience and Curriculum Vitae
Ad Victorem, is a Los Angeles-based agency specializing in brand strategy, visual design and the development of interactive web and mobile app experiences. Founded by two industry veterans who wanted to combat an alarming trend of creative agencies pushing fads and boasting false metrics of “engagement” and “awareness” without connecting them to any goals.

Their name is a symbol of their philosophy; to create strategies for brands who dare to win and then doing their part in bringing them to life.
