Professional Experience and Curriculum Vitae
Photography is something that filters into many aspects of my life. For me creating images is a form of self expression as well as a career. The great days are when those two aspects come together. If there where no hills to climb, life would be flat.

Crazy About...
Donna Karan Bags

The American designer brings her classic, sensual touch to a new collection you'll crave

Donna Karan

Why? "These bags are not of the moment—and that's what I love about them," says Donna Karan. "They're crafted for longevity. What gives them a soul is that they're not just delicious, they also have staying power." **What she likes most** Made from crocodile and ostrich as well as lambskin and shearling, the purses "remind me of ones we did when we started the company," Karan says. "Each has a different personality, and they are all functional. I intend on traveling the world with them, like an elegant bag lady." **What delights us** Named after zodiac signs (but that doesn't mean you have to choose yours), the bags feature strong yet supple skins that are likely to look even better over time. "To me, something that lasts forever is the true definition of luxury," Karan says. —Hal Rubenstein
