Professional Experience and Curriculum Vitae

I graduated with a bachelor in Graphic Design in 2013 and attended a Master in Visual Design in 2015.
I had the chance to work for different companies like Interbrand and Bottega Veneta but then I felt
the urge to be more creatively independent and I became a freelance designer.

I’m passionate and enthusiast especially if we talk about typography, lettering, branding and editorial design.When I'm not working you can usually find me drinking a cup of tea or eating gelato (or both) while binging some tv series till my eyes hurt.

Curiouser and Curiouser, currently based in Milan.
