Professional Experience and Curriculum Vitae
Everything seems to be an opportunity in my eyes. Always looking to this life as a big challenge, hopefully I am going to pass. As an IT student, I have been immersed in the ever-changing digital world. The spark of my artistic journey started by a minor passion for learning Photoshop on 2006, in that time my only aim was creating outstanding advertisement banners and editing photos. In the modern world, I see the web as a place to make money, build reputation and to make new friends.
