Professional Experience and Curriculum Vitae

Hi my name is Stanley Andre Harris but you can call me Andre. I was born in San Diego California, February 7th 1984. I graduated from Helix high School in 2002 and worked in telemarketing for years while pursuing a career writing and recording music. After six years of working a normal nine to five job I decided I wanted a career instead of a job and decided to go college. After looking at a number of universities I decided to attend the San Diego Art Institute of San Diego California for Media Arts Animation. I graduate at the end of March this year with my BAA in Media Arts and Animation. My main areas of interest are motion graphics, editing, visual effects, compositing, photography, stop motion. I am currently a videographer/ video director for local musicians as well as freelance photographer. I'm very social and enjoy being around positive people. I enjoy learning new skills and programs and new ways to do things. I'm willing to move to wherever I can get work and willing to work anytime schedule that is required.

Previous Clientele

So far I've directed and shot a few music videos for local artist. I've also done some freelance photography for local aspiring artist. I've also designed a CD music cover for a local San Diego Artist. I've done photography for the Art Institute's food lounge taking pictures of the food as well as create the lounge's menu.
