Professional Experience and Curriculum Vitae

Andy uses his drawing skills and love of detail to create bizarrely intricate collections of creatures; from rabbits made of tanks to dinosaurs mobilized by 'lots of stuff'. His work has huge visual impact and draws the viewer closer in to a bright and distorted world. He was trained in the traditional techniques of animation and drawing, becoming influenced by Miyazaki and Geoff Darrow amongst others. He now uses a combination of graphics, line drawing, ink and paint pen. Not content with screen or paper, Andy is now assaulting windows and walls with his unique menagerie.
