Professional Experience and Curriculum Vitae
Amit is a multi-disciplinary designer, programmer and an artist producing public and private works for non-profit organizations, corporate clients, collectors, and personal explorations. Amit is the owner & Creative Director at Amit Patel Designs and Studio 314.

Amit has been slightly addicted to technology ever since he was 9, when he got his first computer. His career was briefly intertwined with a 4 year stint as an Engineering & Economics student. He resumed work full-time as a designer, programmer and an artist, 6 years ago; working for firms such as Adobe, Deep Light, Dreamworks, Philips & TBWA Worldwide. He believes that everything should start with an idea, whether it be a simple icon, or a complex application. He also believes that an idea is like an unfinished sentence. Implementation is the key!
