Professional Experience and Curriculum Vitae

Architects Design Studio is a group of best architects in Delhi offering architecture and interior design service for different projects - residential, commercial, hospitality, healthcare, factories and institutional and temples.

As as one of the leading architecture firms in Delhi we firmly believe that architecture is a visual art which begins when two bricks are carefully planned and integrated. For us designing is a lot more than space allocation. As architects and interior designers our main focus remains of effective space utilisation in terms of layout planning. Equal importance is given to the external facade design and interior designing. Our team focusses on the entire design process - from actual execution to finishes and furnishings.
