Professional Experience and Curriculum Vitae
I grew up on the outskirts of town with fields as far as the eye could see. Went to the same school, lived in the same town, stayed in the same house until I went to college. Since then, I've moved four times and a little back and forth in between it all. From country girl to city girl and back, I'm learning what I yearn for with every day that passes.

I've been freelancing as a print designer, web designer, and model since early 2010 on top of maintaining a full-time employee position.

"Creativity is not about art. It is about the basics of life, the forces that drive us and the solution of problems found blocking our progress."

... Sometimes you just have to go for it.
