## Professional Experience and Curriculum Vitae

"I graduated in Design two years ago and has worked with packaging designs, surface design, product design and currently work with web design.

Visual arts and design has always enchanted me, drawing has always been part of my life, of my daily life. I always look for my creative process, mixing great references: the posters of Toulouse-Lautrec, the Japanese Hokusai and Hiroshige, vibration and energy master Van Gogh, the restless dash of Egon Schiele and Klimt textures, all mixed and touch with my personality.

I like the mix of techniques, innovative art with that classic detail. I like the boldness, the simple and minimalist, but the Art Nouveau delights me by your refined style. I like ink, watercolor, the handmade, notebook sewn by me, that imperfect detail that makes my art be mine! "
