Professional Experience and Curriculum Vitae
I am a conceptual, industrial, urban and American photographer who applies a film professional background to create original photoplays and editorials. My work brings attention to the mundane or abandoned by documenting the erosion of urban and rural America. The monographs suggest a sudden occurrence annihilated life with hardly a trace of human activity.

During a career as a film professional in Los Angeles, I worked in every genre and medium of filmmaking and am a classically trained pianist. I attended the liberal arts college Wilkes University in Pennsylvania. You can follow my gallery of work and photographic adventures at www.battle-studios.com.
