From standard residential to multi-million dollar properties, we have the support staff qualified to help you complete or value engineer your design project from start to finish. We also carry a high $2 million general liability policy to safeguard our customers. Some of our services include: lawn maintenance and tree removal. We also repair and install artificial turf. At the Billy Goat, we take pride in our work and in providing the utmost attention to your special needs.

Previous Clientele
The Billy Goat - Autumn Lawn Care in Miami

Fall is right around the corner and – even if you can’t feel it – your lawn knows. The sun is rising a little later, setting a little earlier, and soon these Summer downpours will slow down. So how can you make the best of your South Florida lawn care in autumn?

Don’t worry, we got you. Billy Goat is here with a few easy suggestions to make sure your Fall Florida gardening goes according to plan with the seasonal changes coming. Check it out!

Watering Landscaping
While we’re still getting nice rain, soon it will slow down. If rainfall in your area during these months starts to become rare, water your lawn regularly.

Landscape losses a lot of moisture within just a few days It’s true. The amount of water need not be as plentiful as in the summer months, but without it, your lawn’s soil will begin to dry out from top to bottom. but make sure your grass is at least moist during part of the day.

Get a rain gauge to keep track of how much water your lawn may be getting. Deep roots find can find water sources deeper in soil, but only if there’s moisture to be found. If it’s been over a week since it last rained, it might be wise to water the garden.
