Professional Experience and Curriculum Vitae

Hey!

I am London based freelance creative designer, working in graphic design, motion graphics, illustration, and video editing. I also dabble in videography.

I have had the privilege of working alongside some very cool clients over the years, which have ranged from bluechip corporations, the music industry, and local businesses. I have also worked on bespoke illustrations and designs for weddings, and private commissions.

If you would like to get in touch about working together, drop me a line!
