## Professional Experience and Curriculum Vitae

Ryan Mayer is an enthusiastic and professional artist and designer based in Edmonton, Alberta, Canada. Working across a wide range of disciplines, from identity and branding to print media and web design, Ryan approaches all projects with energy, enthusiasm, an eye for detail and a belief that an initial inspired idea is key to creating effective design solutions. He is quick to grasp new ideas and concepts and develops innovative and creative solutions to problems. He is able to meet the tightest of deadlines in a single bound.

Ryan is a creative thinker, who spreads his time between working with clients and building his own creative projects. Sometimes, there is little separation between the two. He enjoys working with ideas and breathing life into the intangible. He is forever learning and absorbing information, new technologies, skills, styles and insight to bring into his work. His primary strengths lie in visual problem solving, communicating a message and graphic user interface development. He believes that aesthetic and functional solutions come from intelligent and appropriate design.
