Professional Experience and Curriculum Vitae
Introduction - I am a foodie and like good coffee. Also enjoy bicycling, hiking, volleyball and body surfing on the weekends with friends. Working the barbeque, researching stuff and journaling, drawing are some favorite hobbies. The computer gene is alive and well in me, and I am a software engineer by trade, so keeping up on social networking trends, best practices for designing software that works well on the Internet, inside our smartphones and which can expand into those unbounded computing clouds is a constant activity.

Bragging rights - I am passionate about creating well designed computer systems and software, which means dealing with a lot of complex issues in a pretty limited time frame. With each new success I get a lot of satisfaction and am really beginning to enjoy the journey. Being athletic is natural for me, and I'm grateful to have surfed some really big waves, and won some volleyball tournaments and motocross races in the past.

Sturdyworks, my work related enterprise, is committed to the complete satisfaction of our clients. We treat each project as unique putting a strong emphasis on innovation and creativity, while keeping your business objective at the forefront. We take your message and, in consultation with you, refine and transform it into a powerful partner in business. Our full-service design professionals offer custom development work through analyzing the needs of our clients and next formulating a series of creative concepts designed specifically for them. These designs are tailored to the strategic goals of our clients, whether they are a corporation, an artist, or an independent professional. Design Services include:
