## **Professional Experience and Curriculum Vitae**

Born in Slovakia, Branislav spent most of his childhood in Belgium, travelling a lot around the world with his parents from an early age. He graduated at the Private Academy of Fine Arts in Bratislava and afterwards he completed studies at the Institute of Digital photography in Prague. He spent several years working for the leading creative agencies such as BBDO, McCann-Erickson or Saatchi & Saatchi.

The main theme of his work is investigating the way in which modern technology has shaped the human environment and our lives. He is inspired by industrial design, architecture and urbanism. It has been said that his work betrays his roots as an advertising professional; the images produced being cool, stark and unforgiving. The utopian bent of his work with its appreciation of geometry and perspective have already earned him a solid base of collectors and praise from critics worldwide.
