Healthy 1

Healthyism is about a global practice of higher individual potential in order to safely and wisely welcome the absolute best "healthy" which is ultimately good for the Earth and the well-being of its residents.

Practicing "healthyism" means looking at the health of the planet and understanding that we, humans of the globe, are a part of a living organism called Earth. We are an integral biological and psychological one and that we are an inseparable part of its overall body. What we do for or against our planet, we ultimately do for or against ourselves.

What we do for ourselves, good or bad, we do for our planet and all its inhabitants. The practice of "healthyism" suggests that for a healthy world we must start by doing good for ourselves and create and maintain a healthy...

The Key
The key to "healthy" is to be in control of the major manipulators in your head. If you have read the book "Healthyism: Healthy 1, Healthy World" you know by now that those manipulators are mainly made up of all the "inner mental programming" (IM) you've loaded into your brain from the time you were born.

In addition to your IM, your thoughts and actions are highly influenced by your natural impulses which were helpful to human survival at one time but are now causing unnecessary destruction in your life and in the world.

The work of "healthyism" is about focusing on, practicing and welcoming a "healthy" and a better life. When enough of the globe truly is being compassionate and working on personal development, we will welcome a healthy world.

Healthier and Happier Life
