Professional Experience and Curriculum Vitae

Dear Sir / Madam,

It seems to me that I have enthusiastic and motivation on studying all the things about ART, such as design ,photography , computer graphic , drawing

Fortunately, I had a chance to take a two-year Diploma course that was about Design Studies in The Hong Kong Polytechnic University. Through this course, I obtained the fundamental knowledge and concept on various design fields --- graphic, photographic, fashion, product and spatial designs, as well as, trained up my independent thinking and group cooperation skill.

I work for YES! Magazine over four years. My main job was responsible to design layout of the magazine and retouch photos. Certainly, I need to work independently, as well as, sometimes will help my partners to complete the job, which can learn how to help each other.

At leisure time , I would like to take some courses,like photographic course, fundamental computer graphic course and some about languages (English and Mandarin), in order to prepare myself on marching toward to my target .

I shall be greatly appreciated if my application will meet with your favourable consideration.

Yours faithfully,
Miss CHEUNG Lai-ming

Resume

Personal Data
