Professional Experience and Curriculum Vitae

Having trained as an Illustrator, I strive to create functional work that provide ambient light and sense of peace as well as being objects for contemplation.

"The pie charts are designed to be visually pleasing but also aim to serve as a tool. they are a visual representation of impressionist color trends, portraying famous paintings, representing the five most prominent colors in each as a percentage. The removal of figurative, compositional and expressive elements allows us to appreciate, perhaps in a more objective way, the impressionist's flair for color."

Previous Clientele

Cambridge University, The University of the West of England
