Professional Experience and Curriculum Vitae
I'm a web designer working full time in Bangalore City. My main expertise is in flash and 3d, and i try to mix the two whenever possible. Programming is not one of my strengths, which is why i concentrate on the visual design and animation of all my projects... be they games, websites whatever.

Apart from the usual web work i also do CG illustrations as a hobby and partly as an R&D exercise... .I have worked briefly in the 3D PC gaming industry here in Bangalore... its where i picked up most of my 3D skills.

Incidently my final project at college was a sci-fi pop-up book for kids :) and my first job was as an illustrator... i still do the occasional print job.. but mostly stick to the web.

In my free time i play games on my PC and Consoles, read comics, and spend time with my dogs.

Previous Clientele
Please kindly get in touch for more information.
