Professional Experience and Curriculum Vitae

JASON REFUERZO, 30, has been a photographer for nearly twenty years. Learning the skills and techniques of 35mm film cameras at an early age has given him years of exposure to a broad range of techniques. Specializing mainly in fine art landscape and nature photography, Jason brings a passion for the great outdoors to his work. Adventure has always played a major role in his life. Whether it's rock climbing in Yosemite, whitewater rafting in Idaho, or backpacking in the Colorado Rockies, his drive to seek out new places provides him with the opportunity to photograph some of the world's most beautiful landscapes and interesting people. Jason has also developed a strong background in sports and event photography. He has experience as a photographer for the Southern California Special Olympics, as an event photographer for non-profit environmental groups such as Santa Monica Baykeeper, and as an assistant wedding photographer. His images have appeared in various online and print publications.

Jason works and resides in Los Angeles, CA
