Professional Experience and Curriculum Vitae
claire potter design was founded in 2008 with a commitment to producing innovative, sustainable and beautiful solutions for interior, exterior and product design projects.

all interior and garden design concepts begin from detailed site observations and reflect both the spirit of the place and the client. we endeavor to create exciting spaces which have a deep connection to their location and inhabitants.

innovation is a strength of the studio, with many design elements using unusual reclaimed or recycled materials to create a fresh and eclectic British style. the juxtaposition between materials, both hard and soft inform many of our designs, which, along with a detailed site analysis create strong and meaningful spaces.

vernacular materials, local craftspeople and British grown plants are used wherever possible to aid the locating of a project within its surroundings.

environmental ethics sit at the heart of everything we do, and each project is developed to ensure we produce the most sustainable solution to suit the immediate and ongoing requirements of the space and client. the studio has an active environmental policy and the studio is also a member of the Green Register of Construction Professionals.

beautifully eclectic spaces with a heart and soul - this is what we do best.
