

Professional Experience and Curriculum Vitae

PFLB is an AI-driven load testing platform designed to help teams confidently scale their websites and applications. With PFLB, you can effortlessly simulate massive traffic, replicating real-world conditions to ensure your product's performance under peak load.

Key Features:

Automatic Test Plan Generation: Create precise load profiles based on real user data by linking your Google Analytics account.

Realistic Testing: Leverage scenario-based traffic simulations that mirror real-world usage, including high geo-distributed loads.

Seamless Integration: Import your production load profile and easily integrate with your CI/CD pipelines and Grafana dashboards for real-time analysis.

Advanced No-Code Scripting: Harness the power of our intuitive no-code editor to create and customize advanced test scripts.

Advanced Load Scenarios: Execute complex JMeter and LoadRunner tests at scale with ease.

AI-Powered Insights: Automatically identify and resolve performance bottlenecks with AI-driven analytics.

Supported Protocols:

HTTP, HTTPS, gRPC, JDBC, JMS, AMQP, MQTT, Kafka.
