Professional Experience and Curriculum Vitae

Comwell Systems Group is a high technology solution provider that commits to be a single source provider for all your information technology (IT) needs. Since 1986, we have been delivering timely services and affordable technologies to help businesses to keep up with the rapid pace of computer and communications advances and to manage their existing IT infrastructure. Comwell Systems Group has built a first class response and support system to service each and every client in a timely and effective manner. When you call the Comwell support line, you will get immediate response, not from a machine, but a real person. Our helpdesk tier based team is always available and ready to handle your specific IT needs. As your business grows, your IT needs change. Comwell Systems Group provides the resources, such as loaner systems, after hour service, to support your growth without interrupting your day to day operations. We will apply our over 100 years of combined technical experience, to provide you with a best practice network and systems infrastructure solution that best fits your business model.
