Professional Experience and Curriculum Vitae
After picking up my first camera in 8th grade I wanted to show the world what my friends and I were doing on the weekends. Documenting action sports such as mountain biking and skateboarding gave me a background in capturing fast paced motion. This translated into shooting all types of sports related material. Whether it was a portrait, product, or shooting a video, my interest in action and photography go hand in hand. After diving deeper into the world of photography I grew a strong interest in lighting and Photoshop.

Located in San Diego, CA
