Professional Experience and Curriculum Vitae

I am a Vancouver-based photographer – focusing on architecture and urban environments. My portfolio consists of an evolving and diverse collection of works – projects that reflect my interests, experiences, and unique perspective of the world.

My style typically emphasizes strict compositions, clean lines, and de-saturated palettes – with a vision that aims “to bring scale and scope into frame and focus”. In addition to straight photography, I also produce collections of architecture-themed digital abstracts – inspired by my passion for design and the modern aesthetic.

My images have been featured in numerous print and online publications – including Wired, Designboom, and The Huffington Post – and shown internationally. Select abstract works are currently available in limited editions via Pablo & Paul (Munich), with new partnerships and exhibition opportunities currently in the works.

I am available for freelance or commissioned engagements. For inquiries about availability, rates, licensing, representation, or exhibition opportunities – please contact me directly.
