## **Professional Experience and Curriculum Vitae**

My name is Dale Echlin, and I have been passionate about design for as long as I can remember.

I've always been artistic, but it wasn't until I heard of the concept of Graphic Design in my high school years, that I really started to pay attention to it. I noticed a strange collection of books, cd's, and special edition movies lying around, that I felt a connection with. A connection with the packaging, the layouts, the matt finishes.

Three years ago, I was accepted into the Graphic Design Program at St Clair College. I have been pushing myself creatively ever since. My goal as a designer is to make my clients happy. Because if they're happy, I'm happy.
