Professional Experience and Curriculum Vitae

A lifetime of passion for design and user experience, and over 23 years of professional experience. I have worked for big ad agencies both as a Creative Director and a Senior Designer/Art Director, and now use all my expertise to create long lasting relationships on Elance. My focus is on delivering HIGH QUALITY PROJECTS, always aiming beyond clients expectations.

- 23+ years experience
- Top ten ranking on Elance since 2008
- Over 580 successfully delivered projects / 940+ milestones completed
- 99% recommended
- Personal involvement - no subcontracting whatsoever.

** High quality design created with the right concept and the user in mind **

Awards and Accolades

PROFILE

Award-Winning Design – extensive experience on interactive design and digital art. Developed brand and corporate identities, web sites, hot sites, advertisements, high tech, trends, TV and fashion industries among many others, having faced many different technical challenges.

15+ years as Creative Director and Senior Designer for different agencies and companies, and now as an agency owner, I am deeply committed to honesty and transparency in all aspects of professional relationships. Extremely concerned about politeness as a way to freely walk through different cultures and habits, respecting each one's individualities.

My professional experience allows me to understand the project concepts and goals faster, focusing on having precise informations to work on. Technical experience allows me blend in easily on ongoing projects, or creative suggestions based on available team-force and skills.

OBJECTIVE

Actually I'm looking for freelance design jobs, where I can express my creativity and intense passion for design, delivering a very high standard design level. I charge per-project-basis, once nobody would believe how many hours I spend on a project, searching for the exact layout to each client. It's my personal work directive as I'm only satisfied when my client is.
