## Professional Experience and Curriculum Vitae

Garvan de Bruir is a traditional leather craftsman designing for contemporary living needs... His collection of bags suit aircraft carry on dimensions and smaller bags and covers are exactly fitted to various sizes of laptop, netbook, tablet and smartphone. The DE BRUIR studio is based within the equestrian heartland of Ireland and his treatment of fine quality bridle leathers and robust constructions bear as much influence to the local saddlery industry as any existing bag designs.

His 'Parachuter Bag' is a particularly novel for a backpack design. It creates a vintage aesthetic through its use of a traditional material and honest construction techniques but a refreshing new design.

Further technology covers use sheepskin as protective lining to continue with the theme of promoting natural materials.

His design collections can be seen on [www.deBruir.com](http://www.deBruir.com) <http://deBruir.com> and leatherwork can be bought on [www.AviationLuggage.com](http://www.AviationLuggage.com) <http://aviationluggage.com>
