Professional Experience and Curriculum Vitae

AGENT firmly believes that for every mission there is a unique solution.

By re-defining current problematics as design opportunities, we develop custom made experiences for each one of our clients and the end users.

The Way of the AGENT is based on a clear understanding of various markets that we approach through lateral thinking and alternative problem solving.

Based on this standpoint, each project is tackled with an exclusive mindset that is accomplished by bringing together expertise from different disciplines. This operation is supported by an integrative process and fueled by mental flexibility, science and continuous creativity.

With a focus on Disruptive Innovation, our expertise covers product development, digital media, spaces, branding and strategic design.

Implementing The Way of the AGENT means creating innovative results for any segment that requires design; and most importantly, getting involved in projects that positively impact our society and the environment.

Previous Clientele

Adidas, Nike, Hewlett-Packard, SanDisk, KaikuDesign & LeapFrog, among others.
