Professional Experience and Curriculum Vitae

Nice to meet you. I'm Michelle, graphic designer for decembergrace design. I welcome the challenge of using design as a medium for organizing chaos. The doctor is in. With the skill to transform complex data into uniquely interesting and easy to digest formats, my ultimate goal is to showcase your information in the most meaningful way possible. Combining ingenuity with purpose is the core element of my design philosophy, leading to finished products that are thoughtful and captivating. Through my support, your ideas will be elevated to an entirely new level, enhancing marketing potential and visibility. I have solid knowledge of the requirements of the creative process, including typical time and resources needed to produce with efficiency, quality, and to specification. I can take complex design problems and execute them across multiple platforms, print and web. Ultimately, I wear many hats.
