Professional Experience and Curriculum Vitae

Digital Cocoon's site is an image-rich oasis with gorgeous photographs created by their stable of snappers, who include the new rising stars of the Far East - a promising talent pool of hotshot photographers and cool style gurus with an eye for what makes the most beautiful pictures.

With the experience of working on international brands across advertising to glamorous fashion editorials and slick corporate pictures, the work also spans into the realm of art and their photogs have been invited to regularly showcase their work in other spots of the globe as far as Cambodia, Hong Kong, L.A., and London. Which is why 2008 will see expansion of new offices planned in capital cities particularly in Asia.
