Professional Experience and Curriculum Vitae

I am an industrial designer specializing in furniture, exhibits and environments. I have more than 25 years of experience working for museums, corporations and furniture manufacturers. I pride myself in my ability to mold my process to each project. I don't believe there is only one process but rather that the process must adapt to each problem and situation.

I have a strong connection with the end user and always keep that user in mind during any design process. I want my work to connect with people in unexpected and exciting ways. I want to fulfill the needs and wishes of end user while enjoying the process of creation along the way.

Previous Clientele

<http://dieterdesign.com/info.html>
Brown Jordan
Haworth
