Professional Experience and Curriculum Vitae

We design UI\UX that holds under pressure — and the UI design systems that go with it. We work on real digital products — inside platforms, internal tools, B2B SaaS flows, and dashboards that won't stop growing.

We work with product teams who've outgrown their UX. Whether you're scaling a SaaS platform, managing an internal tool, or trying to fix that dashboard your devs keep avoiding — we come in, find what's broken, and design what holds. Our UX and UI design work is embedded, senior-led, and focused on momentum.

That means no full-time hire, no daily check-ins, and no agency fluff. We help teams prioritize what matters, clear blockers, and deliver cleaner, faster product experiences — from UX audits and journey mapping to design systems and UI design that won't fall apart on handoff. We also support product-led growth efforts with high-impact assets: Framer websites, pitch decks, and supporting visuals.
