Professional Experience and Curriculum Vitae
Dom Trapp lives and works in a fishermen village in the south of France.
A graduate from Winthrop University (USA), he addresses his first projects in industrial design with experienced partners. Then, practices graphic design and product design for clients in France and abroad.
The edition of his own concepts is the next step. Quad is an example (www.quad35.com). The public appreciates and encourages the development of the range. Other products are already planned...
His products are like his universe: simple, effective and timeless. The materials used are noble and recyclable. Manufacturing must be ethical and favors sustainable development.
