Professional Experience and Curriculum Vitae

I was born in Russia and moved to San Francisco at the age of 9. When I was 17 I began modelling, and was then introduced to photography.

At 23 I am still evolving and finding my voice, and my photography reflects that, and is changing as well - but it's always honest, playful, sensual, sweet, adventurous, experimental .. I have different aspects to my work -my film work is pure, raw, softer, and I shoot with film the moments I feel very serene and really feeling life. My digital work is something a little more sharper, experimental, edgier, clean, and colourful - but it too has a depth and boldness. I love science (I studied microbiology) and so I'd like to incorporate that more into my work - conceptual, macro-photography of the world which lays beneath and small artifacts of our life enlarged in beautiful magnitudes. I've been living in Amsterdam for the last 3 years and will be moving to Hawaii in a few weeks, so I'm sure my work will evolve to a new level once again ...

I'm interested in taking it to a new level, not just photography - but all the surrounds me. Incorporating sound, video, all art formats, my photography and experiences into creative projects. And I'm looking to collaborate with fresh blood, people who live fully and want to taste life.
