Professional Experience and Curriculum Vitae

I began to self-identify as “looking for adventure.” Passionate for reading about white magic love spells in my ideal time. After graduation and about 10 years of bouncing around the world, I started self-identifying as “an explorer.” And I kept growing until I became uncomfortable as an “employee;” discovered I needed to start my own business. I feel so thankful that I have a successful business. My business is doing really well, and for that I feel so fortunate.
