## Professional Experience and Curriculum Vitae

Fashion photography to them is made by tribe of friends. This tribe includes fashion designers, photographers, graphic designers and more. This is the environment that suits EverywhereWeShoot. The duo of Garovs Garrovillo and Ryan Vergara. Both educated from The College of Saint Benilde (School of Design & Arts), Ryan finishing Multimedia Arts and Garovs Fashion Design and Merchandising. They got together to revolutionize the monotonous type of doing photo shoots.

They actually live up to their name they do shoot everywhere. Their shoots are all about decadence, drama and sometimes they fancy faux air suspensions. They are classic but unpredictable. EWS does stand out from their contemporaries. They are an underground movement who as much as possible tries to shine away from the mainstream. They are modest enough to stay quiet about their achievements which probably why they have been attracting like minded clients who doesn't wanna end up as cliches. EWS made waves among the younger arty crowd.

A lot of avant garde designers and independent musicians have been commissioning them to do their photo shoots or graphic design. In our time where everything we visualize seems to make us feel jaded. EverywhereWeShoot is like a breath of fresh air. It's new it's absolutely fresh and it's what the kids in the know dig.

## Previous Clientele
