Professional Experience and Curriculum Vitae

I strongly believe in the visual language, it's potential to exceed borders. Like music it connects people by getting under the skin, into that inner room where we meet ourselves and make our experiences ours. We have a dialogue!

I love to be told stories, and start my own journey from there. "Thanks for taking me so far, now I manage by my own".

And - I love to tell stories, to take you out to the forgotten shores, or to a mountain peak from where you can watch "the hole world". This is what I have to offer - my gift. Hey World, come and share my visions!!

Whether you wish to buy a piece of art, or you would like me to do a commission or cooperate on a job, I always base my work on curiosity, passion and commitment. What is strongest of curiosity and passion differs, but the commitment is always there. Let's talk in pictures; my commitment is my vehicle. The fuel is a mix of passion and curiosity.

Let us join forces! Let us take a trip. Where? Who knows - and who cares as long as creativity is our driver.
