Professional Experience and Curriculum Vitae

I'm an illustrator based in Ottawa and recently completed a Bachelor of Architectural Studies degree. I have a background in fine arts as well as experience working with a graphic design firm. Over the years I have developed a distinct drawing style influenced both by technical training and more creative explorations.

Previous Clientele

I've completed illustrations for a campus newspaper, a national science competition and promotional material for local events. However, most work I do is personal artwork rather than projects for specific clients.
