Professional Experience and Curriculum Vitae

I was drawing as early as I remember, and started reading shortly after that. Aside from a thirty year visit to abstract expressionism land, all my work is about telling stories. I especially like those stories that between the world that is and the worlds of pure imagination, where measurable truth and day dreaming desire mash up, but tell a coherent and compelling tale none-the-less. And if they are non-sensical and/or silly, all the better.
