Professional Experience and Curriculum Vitae

I am an artist and storyteller whose primary interests are love, music, writing, and capturing the nebulous energy of existence to condense it into a visual language that can hold it still with some clarity for just a moment.

Images can communicate things about existence that we are unable to express in any other way. Often there are some ideas we can't even comprehend without them. I make images to see these intangible things clearly for myself and hopefully make them conceivable and accessible for others.

Previous Clientele

20th Century Fox Digital Studios, Society of Illustrators of Los Angeles, City Coffee, The Comic Bug, OVGuide, First American Corporation
