Professional Experience and Curriculum Vitae

I am a 24 year old writer, photographer, and teacher from New Hampshire. After spending my earlier years writing and photographing along the east coast, primarily in the Boston area, I decided in the last three years that I wanted to explore the world. I've taken two, five month long trips Australia, and recently embarked on a month long trip to Ireland. My goal is to document life experiences, emotions, triumphs, and tragedies. I am an honest to the core writer. After all, Life doesn't move in slow motion. It moves fast. SO fast. One minute you're six years old singing in your elementary school holiday concert, the next minute you're graduating college, walking down the aisle, buying a house, having children, and watching THEM singing in the (sometimes quite painful) elementary school holiday concert. I write and photograph, so that when I turn my back, these moments will live on forever.
